

Specifications Maxam Chirchiq Ammonium Nitrate	
Fraction of total mass nitrate and ammonium nitrogen in terms of nitrogen in dry substance, %, min	34,4
Mass fraction of water, %, no more than: - with sulfate and phosphate-sulfate additives - with calcium nitrate and magnesium additives	0,2 0,3
Mass fraction of substances not soluble in 10% solution of nitric acid, %, no more than	Unnorm.
Granulometric composition: - from 1 to 3 mm, %, no less than - from 1 to 4 mm, %, no less than - from 2 to 4 mm, %, no less than - less than 1 mm, %, no more than - more than 6 mm, %	Unnorm. 95 80 3 0,0
pH 10 % - water solution, no less than	5,0
Static strength of granules, H/granule (kg/granule), min, with calcium nitrate and magnesium additives	8 (0,8)
Friability, %, no less than	100
